

Fullerton Lux Funds - Asian Bonds - Class A (USD)

February 2020

Investment Objective

The investment objective of the Fund is to generate long term capital appreciation for investors by investing in fixed income or debt securities denominated primarily in USD and Asian currencies, issued by companies, governments, quasi-governments, government agencies or supranationals in the Asian region. These countries include, but are not limited to China, Hong Kong SAR, Taiwan, South Korea, India, Thailand, Malaysia, Singapore, Indonesia, the Philippines, Pakistan and Vietnam.

Investment Focus and Approach

The Investment Manager intends to seek out these sources of alpha for the Fund: interest rate, credit and currency. The Investment Manager's investment process is a combination of top-down macro research involving economic research and monetary policy analysis to arrive at interest rate and currency outlooks; as well as bottom-up analysis based on credit selection and yield curve positioning. Within this framework, the Investment Manager will evaluate whether bond markets offer value, the relative value across markets and the outlook for credit. These views form the basis for formulating their duration, bond market allocation, currency and credit strategies.

FDIs may be used for efficient portfolio management purposes.

Performance (%)

	1 mth	3 mths	6 mths	1 yr	3 yrs	5 yrs	Sl. Ann. Ret.	Sl. Ann. Vol.
Fund (bid-to-bid)	0.67	2.34	3.29	10.28	5.02	4.62	4.34	3.24
Fund (offer-to-bid)	-4.12	-2.53	-1.63	5.03	3.33	3.61	3.65	NA
Benchmark	1.34	3.12	3.29	11.64	5.63	4.80	4.39	3.51

Returns of more than 1 year are annualised. Returns are calculated on a single pricing basis in USD with net dividends and distributions (if any) reinvested. Offer-to-bid returns include an assumed preliminary charge of 5% which may or may not be charged to investors.

Benchmark: JACI Investment Grade Total Return.

Market Review

Risk assets sold off sharply in February as the COVID-19 outbreak spread beyond China, disrupting global supply chains and impacting economic activity.

Federal Reserve Chair Jerome Powell said in a statement that COVID-19 posed "evolving risks" to the US economy and that the Fed was "prepared to act as needed". Against this backdrop, US Treasuries rallied on the back of a flight to safe haven assets and the 10-year and 30-year yields declined sharply. Asian credit extended gains in February, with the positive performance driven mainly by Treasury gains while credit spreads widened out.

Within Asian credit, the investment grade sector (as measured by the JACI Investment Grade Index) outperformed with a return of 1.34% in USD terms, while the high yield sector (as measured by the JACI Non-Investment Grade index) delivered a marginally negative return in USD terms. From a country standpoint, Thailand and Taiwan outperformed the rest of the region. By sector, oil & gas and TMT were the standout performers. Metals & mining and transport were the laggards.

Inception date

16 Oct 2012

Investment Strategy

The economic impact of a virus outbreak such as COVID-19 would depend on how long it takes to bring the virus under control, and it is still difficult to gauge with certainty. There are typically three stages surrounding adverse economic shocks – an initial period of uncertainty, followed by a period of stabilisation and thereafter, a period of sharp market rebound. We share the view the global economic impact of the coronavirus outbreak will be felt most deeply in the first half of this year, followed by a normalisation of business activities, and a rebound in the second half.

Within Asia, policy responses to date have been strong and swift. Asian policymakers have focused on ensuring there is adequate liquidity to avoid stress and in maintaining the flow of credit, particularly to the SMEs. While we have seen some preemptive monetary easing in Asia (in the likes of Thailand, Malaysia, Indonesia), fiscal policy will also play a prominent role, especially for nations with the fiscal flexibility (such as Singapore, Korea and China). Core inflation is likely to remain benign, reflecting weak domestic demand. Supply factors may result in higher food prices but this is likely to be transitory.

On the investment strategy, our investment thesis to keep duration close to neutral has helped to mitigate against the widening of credit spreads. US Treasury yields could remain rich in the near-term given growth headwinds and potentially further rate cuts. The high yield exposure, which is concentrated in the shorter-dated tenors, may come under some pressure but the attractive carry will potentially underpin performance. Looking ahead, we expect increasing credit differentiation to reward fundamental-based investors, as corporates go through the downturn due to the virus outbreak. Hence, default risks will potentially remain largely idiosyncratic.
